EXAMINER'S COMMENT

Reasons for Allowance

1. Claims 21-33 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including: a first emission control device coupled exclusively to said first group of cylinders; a second emission control device coupled exclusively to said second group of cylinders; a third emission control device coupled downstream of both said first and second emission control devices; a controller for operating a first mode with both cylinder groups combusting air and injected fuel, the engine producing a first range of engine output during said operation in said first mode; and operating in a second mode with said first cylinder group combusting and injected fuel and said second cylinder group pumping air without injected fuel, with the engine producing a second range of engine output, with at least a portion of said second range being at a lower output than a lower end said first range.

Any comments considered necessary by applicant(s) must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
